## SKILLSET

- Web Development: Next.js, React.js, HTML5, CSS3, Tailwind CSS

- Backend & Database: Node.js (basic), MongoDB, MongoDB Atlas, MySQL

- Tools & Platforms: Git, GitHub, Weebly, Vercel

- Cybersecurity Tools: Kali Linux, Nmap, Wireshark, SIEM

- Languages & Programming: Python, Java, C#, JavaScript

- Additional Skills: SEO Optimization (basic), UI/UX Improvements, Responsive Design, Web Deployment

- Quick learner & problem solver

- Passionate about health-tech and innovation

# INTERNSHIP EXPERIENCE

- Full-Stack Developer Intern, Prodigy InfoTech (Summer 2024) – Collaborated on full-stack web application development using React and Node.js. Implemented front-end interfaces and back-end APIs, conducted code reviews and testing, and applied security best practices to ensure application reliability and protection against vulnerabilities.

# PROJECT

- DC Dental & Medical (Australia) Website(DC Dental & Medical):
  Designed and published a responsive clinic website using Weebly. Integrated Google Forms for online appointment booking and file uploads. Currently enhancing SEO and improving the site's UI/UX for better discoverability and engagement.
- Morton Dental & Pullen Dental Websites (Morton Dental | Your Local Dentist in Noosa):
  Developed and deployed a fully responsive dental clinic website for a live Australian client using Next.js and Tailwind CSS, with full ownership of domain setup, web hosting via HostingBay, and production deployment. The project included building key pages like Services, About, Offers, Team, and Contact with Google Maps integration and external booking functionality. Collaborated with a team to ensure the site aligned with client needs, maintained clean UI, SEO best practices, and delivered a fast, optimized user experience.
- Pilikula Visiting Places (Group Project)

  Designed a Flask-based web application featuring an interactive flashcard layout to display information about five key places in Pilikula.

- Movie Recommender System

  Developed a genre-based movie recommendation web application using Python and Flask as the backend framework and Bootstrap for responsive frontend design. GitHub: github.com/Smuktha/movie-recommender
